

H-410

ALL-WEATHER DESIGN
FOR ANY CONDITION

CHOOSE H-410: TRUST, SAFETY, SUCCESS!

H-410 DESIGN HIGHLIGHTS

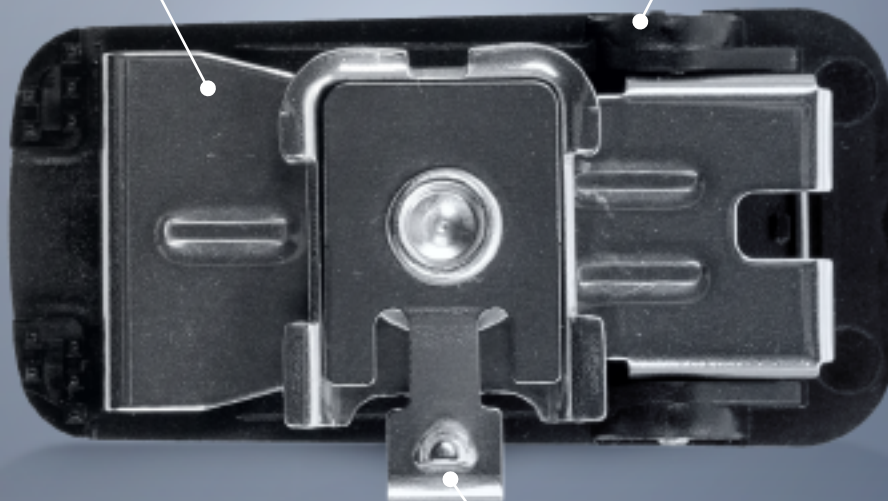

BACK CLIP

FAST, SECURE,
AND
DURABLE!

Stainless Steel

High-Strength Plastic

Quick-Release Latch

3 STEPS

Quick-Release Back Clip

1. Gently lift the release latch upwards.
2. Simultaneously press the back clip downward.
3. Remove the back clip from the H-410 body.

To reattach the H-410 back clip, simply reverse the process and skip step 1.

POWERFUL AUDIO

A POWERFUL SOUND SYSTEM CREATED
BY THE COMBINATION OF ACTIVE AND
PASSIVE SPEAKERS.

¹ ACTIVE SPEAKER

The H-410 speaker delivers impressive volume. In rescue scenes, the roar of machinery and cries of people, during firefighting, the flames and commands, and in security operations, the surrounding noise are all clearly audible.

1

² PASSIVE RADIATOR

The Passive Radiator is a technology used to improve bass response. It is driven entirely by airflow within the enclosure, reducing distortion and power loss, making the speaker system more energy-efficient.

ANTI-SLIP DESIGN

IN RAINY OR HIGHLY HUMID ENVIRONMENTS,
IT EFFECTIVELY INCREASES STATIC
FRICTION.

RUBBER MATERIAL

This rubber is a blend of natural and synthetic rubber, processed through a special technique that forms a cross-linked structure between rubber molecules, enhancing its strength and abrasion resistance. By precisely controlling parameters such as time, temperature, and pressure, the rubber achieves ideal physical properties.

The H-410 is available in a variety of colors:
Red, Orange, Black, and Neon.

3.5mm Audio Socket

DEVICE CONNECTIVITY EXPANSION

THE H-410 FEATURES A 3.5MM AUDIO SOCKET (CTIA), ALLOWING YOU TO EASILY CONNECT HEADPHONES AND ADAPT TO YOUR WORK ENVIRONMENT.
