ONE VERSATILE DESIGN**
THE PERFECT BLEND OF EARBUD AND HEADSET
H506

PROFESSIONAL COMFORT, ANYWHERE, ANYTIME

HS06 COMBINES EFFICIENT SOUND TRANSMISSION AND VERSATILE DESIGN, ADAPTING TO VARIOUS WORK ENVIRONMENTS WHILE PROVIDING A STABLE AND COMFORTABLE WEARING EXPERIENCE.

The HS06 ear-hook headset is designed for professional work needs, featuring a lightweight and comfortable ear-hook design for long-lasting wear. Equipped with efficient acoustic tube technology, it ensures clear audio transmission, even in noisy work environments, maintaining smooth communication. Ideal for industries such as construction, logistics, and security, it comes with multiple interchangeable ear tips to meet diverse user requirements.

HS06

HIGH-PERFORMANCE SOUND, UNMATCHED CLARITY

The HS06 is a highly specialized ear-hook headset combining advanced audio transmission technology and an adjustable design to provide clear and stable communication, even in noisy environments or during long-term wear. Its adjustable headband design ensures compatibility with various safety helmets or everyday caps, offering the perfect solution for different work scenarios. The built-in high-performance micro sound unit guarantees crystal-clear audio, while the three ear tip options ensure optimal comfort, enhancing work efficiency.

HIGH-QUALITY SOUND UNIT FOR CLEAR COMMUNICATION

HS06 DELIVERS EXCEPTIONAL AUDIO PERFORMANCE, ENSURING SMOOTH AND CLEAR COMMUNICATION IN NOISY ENVIRONMENTS.

The HS06 features a premium micro sound unit with a high-performance speaker, delivering outstanding audio output. Whether on a noisy construction site or during outdoor duties, the HS06 ensures clear transmission of two-way radio communication, guaranteeing smooth conversations. Its compact design combines functionality and aesthetics, enabling crystal-clear and efficient communication during operations.

SPEAKER SOUND UNIT FOR ENHANCED COMFORT AND LONG-LASTING WEAR

The HS06 uses a speaker sound unit, delivering clear communication through a sound tube. Its lightweight, ergonomic design ensures comfort during extended wear, making it ideal for noisy environments or long hours of use while maintaining stable performance.

HS06 SPECIAL EARPHONE DESIGN

The HS06 features a unique design that combines two types of earphones for a versatile listening experience. Sound is transmitted through the speaker unit and delivered to the earbud via a sound tube. Depending on your work environment, you can easily switch between different types of ear tips (see page five). This hybrid design offers the secure fit of an ear hook headset with the comfort and noise-canceling benefits of an earbud, ensuring clear communication even in noisy surroundings.

THE CHOICE OF SOUND

THE HS06 OFFERS A VARIETY OF EAR TIPS TO MEET DIFFERENT NEEDS, DELIVERING THE BEST WEARING EXPERIENCE.

THE BALANCE OF SOUND AND COMFORT

The HS06 comes with three professional ear tip options, each designed to address specific requirements and provide the best user experience.

SINGLE-LAYER EAR TIP

The single-layer ear tip features a simple and lightweight design, ideal for tasks requiring flexibility. It offers moderate noise isolation while ensuring comfort for extended wear.

DOUBLE-LAYER EAR TIP

Designed for noisy environments, the double-layer structure provides enhanced noise isolation, effectively blocking external distractions for a clearer auditory experience.

ERGONOMIC EAR TIP

Shaped to fit the ear canal, the ergonomic ear tip ensures excellent stability and comfort, making it suitable for prolonged use and accommodating various ear shapes.

TAILORED FOR PROFESSIONALS

**STABLE AND COMFORTABLE,
ANYWHERE, ANYTIME**

THE IDEAL COMPANION FOR PROFESSIONAL WORK ENVIRONMENTS

The HS06 is an ideal companion for professional work environments. Its adjustable headband design allows seamless use with safety helmets or regular caps, making it perfect for construction sites, logistics, security, and other roles requiring headgear. The flexible microphone arm adjustment ensures optimal voice capture, unaffected by surroundings.

Whether on outdoor assignments or in noisy settings, the HS06's exceptional performance and versatile design enable every user to maintain effective communication and boost work efficiency.
