HM15 Connector

The JCK HM15 connector adopts a quick connector design that is compatible with JCK's FH1 connector, providing high-quality audio for your headphones and microphone. It also supports the latest Motorola walkie-talkies, embracing the communication devices of the new generation.

Anti-Drop Design

The HM15 features an anti-drop design, which, when paired with the JCK FH1 connector, effectively prevents the connected devices from detaching from the walkie-talkie, ensuring safety.

Quick Connector Design

The HM15, with JCK's FH1 connector, offers quick and easy equipment replacement, saving time during shifts with reliable plug-and-play performance.

Supports

- ✓ Supports Microphone Recording.
- ✓ Supports L&R Dual-Channel Headphones.

The waterproof design protects the connector, preventing damage by keeping foreign objects out.

JCK uses durable materials and robust casing, tested for reliable performance in tough conditions.

DETAILS.

Connector Type : Hirose

Material : Plastic

Features : Quick Connector

Compatibility : MXP600 / R7 / ION SmartRadio / APX N70 / APX / N50 / APXN30

M15J Connector

The M15J is a connector developed by JCK for the new era of walkie-talkies. It features a 3.5mm headphone jack design, supporting most 3.5mm headphones, and also provides compatibility with L&R dual-channel headphones. For more information, you can refer to the headphone products available on the JCK website.

3.5mm Connector

The M15J utilizes a 3.5mm connector, making it compatible with the majority of devices that use a 3.5mm connection.

Supports

- ✓ Supports L&R Dual-Channel Headphones.
- ✓ Supports 3.5mm headphone jacks for JCK D1, D2, and D3

D1 3.5mm jack

D2 3.5mm jack
