INNOVATION IN MOTION

REDEFINING TRADITION

SAY GOODBYE TO THE FLAWS OF LAPEL MICROPHONE

ERGO-AESTHETIC HARMONY

STYLE & COMFORT FUSION

The PT29's exterior design resembles a meticulously crafted work of art, blending fashion elements seamlessly with ergonomic principles. Inspired by the shape of angel wings, it features an innovative bionic design concept. At the upper end, complex surface modeling and mechanical analysis were employed to create a wing-span cable exit angle. This design isn't purely for aesthetics; it stems from an in-depth study of human motion and acoustic principles. When using the PT29, the wing-span exit angle naturally adjusts the direction of the headphone cable according to the user's movements, eliminating the issues of traditional cable tangling or tugging. This ensures a comfortable wrist posture during extended use and minimizes muscle fatigue.

PRODUCT FEATURES :

- *Ergonomic design*
- *New shape*
- *Angled headphone jack design*
- *Large silicone PTT button*
- *Dual PTT button mechanism*
- *Anti-slip and drainage*
- *Headphone jack protection*
- *PT29 series enhances corporate image and unity*

PRECISION IN EVERY DETAIL

ERGONOMIC CURVES, ANTI-SLIP GRIP, AND RESPONSIVE SILICONE BUTTONS FOR ULTIMATE COMFORT AND CONTROL.

DURABLE COMFORT WITH ANTI-AGING SILICONE BUTTONS

In addition to the excellent performance mentioned earlier, the silicone material used for the buttons also offers good biocompatibility and anti-aging properties. This means that over extended use, the silicone buttons will not cause allergic reactions from contact with the skin, nor will they become hard or brittle over time, maintaining their superior touch and functionality.

BREAKTHROUGH DUAL-BUTTON DESIGN

The dual-button design is a groundbreaking technological innovation. By cleverly combining materials with different hardness and elasticity, it significantly enhances the button's touch sensitivity. This design allows the button to respond quickly with a light touch, while effectively distributing pressure during long-term, frequent use. It prevents localized stress concentration, greatly extending the button's lifespan and ensuring the product's stability and reliability in complex usage environments.

IP68 RATING

It can be submerged in water up to a depth of 1.5 meters for 30 minutes.

3.5mm SOCKET

Provides external headset connection functionality.

Side PTT(Push-To-Talk)

3.5mm Socket

360° Back Clip
(Garment Protection)

Anti-slip grooves

Strain Relief Cable (Customizab)

FUSION OF VERSATILE DESIGN CUTTING-EDGE TECHNOLOGY

BASED ON AN ADVANCED MODULAR DESIGN CONCEPT
OFFERING USERS A VARIETY OF DESIGN OPTIONS

- PT29: Features separate cable exits for earphones and plugs at both the top and bottom, allowing flexible wearing styles.
- PT29A: Includes a 2.5mm earphone jack on top and plug cable exit at the bottom—ideal for compact setups requiring a smaller jack.
- PT29B: Comes with a 3.5mm earphone jack on top and plug cable exit at the bottom, making it compatible with a broader range of earphones while maintaining flexibility.
- PT29D: Both earphone and plug cables exit from the bottom, offering tidy, single-direction cable management.

LEADING THE TREND PT29 LAPEL MICROPHONE

PT29 redefines the lapel microphone with versatile cable options, ergonomic design, durable materials, and dustproof and waterproof features. It precisely meets professional needs across various industries in any environment. Whether in business, media, outdoor, or security fields, PT29 provides clear, stable audio for demanding work.

PT29—THE PROFESSIONAL'S CHOICE

PT29 is more than a microphone; it's a symbol of professionalism. From quick response to discreet communication, it delivers clear audio to meet high standards across industries. Choose PT29 for outstanding sound quality!
